[LinkedIn](#) [Medium](#)

Engineering lead and software architect with 15+ years of experience. I build development teams and the technical foundation they need to ship products on their own: grew an in-house development department from a team of three to 12 people, defined the architecture for a growing domain service landscape (9 services in production today) and consistently handed product ownership over to the team. Technically at home in distributed systems, hybrid cloud architectures (GCP / STACKIT) and Kubernetes. From the idea to running in production.

PROFESSIONAL EXPERIENCE

Dec 2021
– Present

Team Lead “Digital Development” Europa-Park GmbH & Co Mack KG

The brief: build an in-house development department from the ground up. I laid the technical foundation myself and then grew the team to the point where it builds products on top of it independently. Including handing over product ownership.

LEADERSHIP & ENABLEMENT

- **Team building & ways of working:** grew the in-house development department from a team of three (including me) to 12 people today; introduced and established SCRUM, including training both the team and the executive board in agile ways of working.
- **Laid the technical foundation:** technology stack (Angular, Nest.js), hybrid cloud environment (GCP + STACKIT) with Terraform, Kubernetes clusters and managed databases (MongoDB, Redis), plus GitOps and CI/CD (Bitbucket Pipelines, ArgoCD). The base the team delivers on independently today.
- **Architecture of our domain services:** defined how domain services are built. The blueprint the team has been building new services against ever since.
- **Handed over product ownership:** two years as product owner for the MackOne Account, then handed over to a product owner within my own team.
- **Hybrid AI team:** jointly led with the team lead for Customer & Market Intelligence. I own the technical side. After an external agency kickstarted the effort, we filled three positions internally (two of them developers/DevOps reporting to me) to bring the know-how into the company for good. What we are building is “Ecki”, an agentic AI platform. Its first product is a chat-based assistant that connects company knowledge and replaces shadow AI solutions (ChatGPT and the like).

- **Digital Services:** 9 domain services in production, one more in development. It started with the gastronomy master data service during the move to Kubernetes, with REST APIs for self-order terminals, mobile ordering and digital signage.
- **Brought the MackOne Account in-house:** hosted pages and the central user profile initially came from an agency and now sit entirely with the team; the identity backend is still cidaas.
- **PrivacyLog:** my prototype for cross-platform GDPR-compliant data deletion became a product of its own, a microservice on Kubernetes with its own product ownership. Today it is part of the Digital Services as well.

– Dec 2021

Manager Digital Platforms

Europa-Park GmbH & Co Mack KG

- **SSO project** → **“MackOne Account”**: technical project lead for introducing a central customer identity & access management system for all digital platforms (shops, apps, marketing automation); selected and integrated cidaas as the identity backend, built it out as the “MackOne Account” product, later took over as product owner
- **Consulting:** advised several teams & service providers on software architecture, DevOps, platform independence and standardised APIs
- **Development:** implemented web applications and scripts for data aggregation and for connecting third-party software to the CIAM system
- **Training:** upskilled colleagues in Docker, Kubernetes, infrastructure as code, CI/CD, clean code and DevSecOps

CIAM

Docker

Kubernetes

DevSecOps

IaC

CI/CD

Apr 2017
– Jun 2020

Software Developer & Architect

Groz-Beckert KG

- **Product administration:** administration & further development of “Ideal Needle Handling” (Meteor.js, MongoDB, IBM Cloud, Docker/Kubernetes)
- **Web components:** designed & built Angular components for digital sales apps (JavaScript/TypeScript)
- **Microservice architecture:** designed and implemented a new microservice-based software architecture – Kubernetes with Istio service mesh, Nest.js services (TypeScript), NATS messaging, MinIO object storage, Keycloak as identity provider, central REST API gateway
- **DevOps:** monorepository development with automated deployment via Bamboo

MongoDB

Bamboo

Aug 2016
– Mar 2017

Software Developer & Architect

Retail United GmbH & Co. KG

- **Online point-of-sale solution:** designed & built a retail POS system with an interface to the cloud ERP “weclapp” (PHP, Node.js, MySQL, JavaScript)
- **IoT device:** developed a device for driving receipt printers and cash drawers from the cloud (Linux, Node.js)
- **Third-party integrations:** connected payment providers (e.g. SumUp)

- **Infrastructure:** provisioned all services for development, operations and deployment; Linux server administration

PHP Node.js MySQL Linux IOT

Jul 2015
– Jul 2016

Software Developer

KabelWelt GmbH & Co. KG

- **Web apps:** monitoring apps for sales figures from roughly 50 retail locations (PHP, MySQL, JavaScript)
- **Framework:** built a base framework for future web projects (PHP, Node.js)
- **Infrastructure:** provisioned & administered a new web server (Linux, Plesk); ran the migration from MS Exchange to Apple OS X Server

PHP Node.js MySQL Linux

Jun 2013
– Jun 2015

Software Developer

RSU Reifen-Center GmbH

- **ERP system:** administration & further development of the company's in-house inventory management system
- **Online platforms:** further development of reifensuche.com and tyresystem.de
- **New development:** team-based design and implementation of new software components (PHP, MySQL, JavaScript)
- **Infrastructure:** Linux server administration; Git version control

PHP MySQL Javascript Linux Git

Mar 2009
– Apr 2013

Intern / Working Student

MediaLas Electronics GmbH

- **Master's thesis:** prototype for body-based control of laser projectors using Microsoft Kinect
- **Bachelor's thesis:** management system for components, serial numbers and repairs (PHP, MySQL)
- **Web:** designed and implemented the company websites (Typo3)
- **Shows:** independently planned and delivered laser shows

PHP MySQL Typo3 Kinect

EDUCATION

2010 – 2013

Master of Science (M.Sc.) – Media and Communication Computer Science

Grade: 1.5 (German scale, 1.0 = best)

Reutlingen University

- **Thesis:** interactive control of show laser projectors using the Kinect tracking system
- Focus areas: collaborative systems, visualisation, human-computer interaction

2007 – 2010

Bachelor of Science (B.Sc.) – Business Information Systems

Grade: 2.2

(German scale, 1.0 = best)

Reutlingen University

- **Thesis:** concurrency of transactions within a web application

- Focus areas: computer science fundamentals, software development, business administration

2006

Abitur (German university entrance qualification) Grade: 2.6 (German scale, 1.0 = best)

Philipp-Matthäus-Hahn-Schule Balingen – Technical Secondary School

- Specialisation: design and media technology

SKILLS & EXPERTISE

Expert: owned in production, including architecture and operations · **Advanced:** used in production several times · **Familiar:** used when the problem called for it

FRONTEND

Expert Typescript, Angular, HTML
Advanced CSS, SASS
Familiar Svelte(kit), Vue.js, Next.js / React

BACKEND

Expert Nest.js, Laravel, PHP
Advanced Express.js, Python, C#
Familiar Java, Go

CLOUD & INFRASTRUCTURE

Expert GCP, STACKIT, Docker, Kubernetes, Terraform, Portainer
Familiar Ansible

CI/CD & DEVOPS

Expert ArgoCD, Bitbucket Pipelines, GitHub
Advanced Bamboo, GitLab, Dash0
Familiar Grafana, Prometheus, Datadog

DATABASES

Expert MongoDB, MySQL, Redis
Advanced MariaDB
Familiar Postgres, CouchDB, InfluxDB

SECURITY

Expert OAuth2, OpenID Connect, Trivy, Zero Trust
Advanced Keycloak
Familiar Istio

METHODS & PROCESSES

Expert SCRUM, Clean Code, GitOps, Extreme Programming, Microservices, Domain-Driven Design

TOOLS

Expert Visual Studio Code, Jira, Confluence, Git, Docker Compose

LANGUAGES

German **English**
